Tesla Australia must now win on ownership experience

Passenger EV market · 24761 Data-Driven Insights

+241% vs +67%

BYD vs Tesla EV growth, H1 2026

86.5%

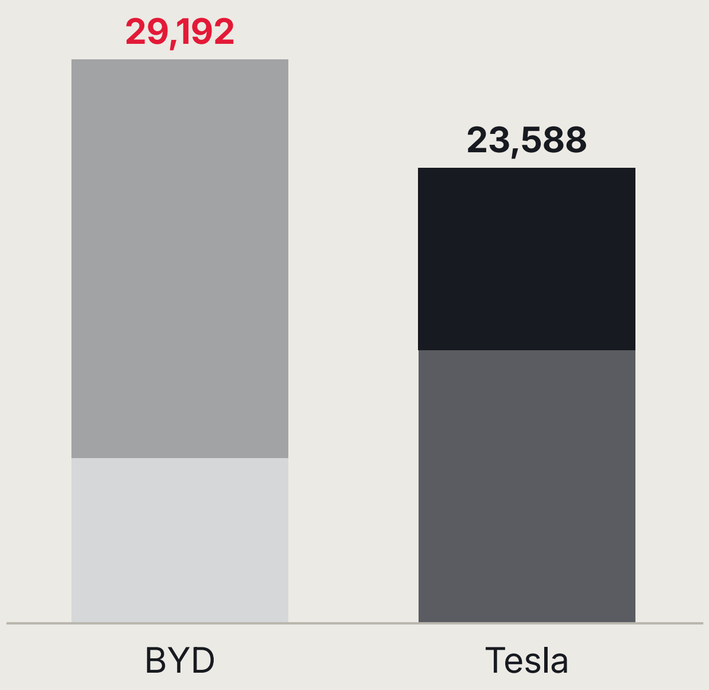

of Tesla's AU deliveries came from Model Y, H1 2026

2.50 / 5

Service and repair: lowest of 4 major themes (exploratory data)

1 THE PROBLEM

EV benefits are no longer uniquely Tesla's

Lighter = H1 2025 · darker = growth to H1 2026

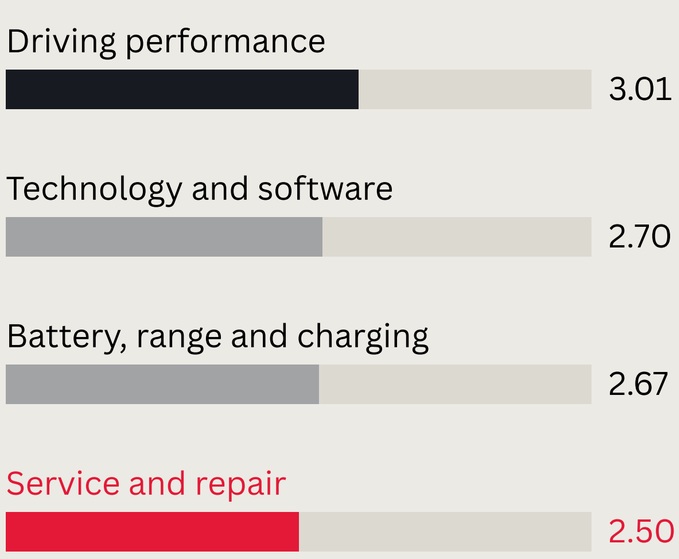

Value proposition compression. EV models under $60k rose from 19 to 55. Tesla's benefits are now category benefits.

2 AI-ASSISTED INSIGHT

Driving rates best, service rates worst

500 reviews → GenAI review data insight → VADER sentiment → rating check

Average star rating (out of 5), 4 major themes

Charging is discussed most (43.6% of reviews), but service and repair is rated lowest and carries the most negative sentiment (30.2%).

Data: synthetic review dataset (Appendix 1)

3 CRITICAL LENS

Kind words, low stars

66%
positive review text (VADER)

51%
rated only 1–2 stars

Two sources, two stories
Real reviews (small samples):
Tesla 4.2–4.3 vs BYD 3.3–3.4.
Synthetic dataset: 2.64 average

Limits of the evidence
Synthetic data · 38.8% duplicated text · lexicon sentiment misses mixed reviews (praise the drive, criticise the service). Findings are exploratory.

Treat AI output as a lead, not a verdict: validate with real owners.

4 PRIMARY RESEARCH

Validate with real Tesla owners

Who: Tesla owners across Australian cities, models, and ownership stages
What: 5–7 point Likert survey measuring service, charging, Autopilot/technology, driving, recommendation, repurchase, and mobility context.
Why these measures? Exploratory analysis highlighted service access, long trips, and Autopilot-related experiences that need validation with real owners.
How: compare attribute importance with satisfaction to find the strongest drivers

5 MANAGERIAL IMPLICATIONS

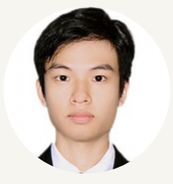

Segment owners by mobility need, then act

Product
Strengthen ownership support for high-need segments

Place
Improve service and charging accessibility where owners need it most

Promotion
Communicate the benefits each segment values most

Priority: act first on high-importance, low-satisfaction attributes.
